Lenovo

Edge to Core to Cloud

The future is hybrid but getting to the Cloud is just a milestone: flexibility, scalability and cost-transparency make the journey worthwhile.

As organizations look to become more agile and take advantage of the new digital business opportunities, they can't build their success on outdated, expensive, and resource-consuming infrastructure strategies. Instead, they need the support of infrastructure that is flexible, scalable, and cost-effective, all at the same time.

Lenovo TruScale Hybrid Cloud with VMware is designed to address these challenges.

A future-proofed Hybrid Cloud solution gives enterprises access to the infrastructure resources they need, when they need them, with the flexibility of a scalable pay-as-you-go model.

Resolve your Cloud adoption challenges and drive digital innovation with Lenovo TruScale Hybrid Cloud with VMware

Lenovo TruScale Hybrid Cloud with VMware HCI is a hyperconverged infrastructure cluster solution that hosts virtualized workloads and their storage in a hybrid environment, combining the security of on-premises infrastructure with the simplicity of cloud operations.

Based on Lenovo's best-in-class ThinkAgile VX HCI platform and VMware's industry-leading software, the hybrid solution allows enterprise customers to orchestrate and manage their IT environments reliably, securely, and flexibly.

Our solution provides:

- Futureproof infrastructure with the ability to scale out on-premises or in public cloud, balancing the deployment mix.
- Operational simplicity: virtual machine lift and shift support through standardized VMware architecture.
- Seamless user experience through managed services for virtualization and extensive infrastructure support from a single vendor.
- A fully integrated approach to enable organizations of all sizes a cost-efficient route to enhancing business agility.

Benefits

Scalability to support evolving business requirements

Scale up to support current needs, seasonal requirements, and growth expectations.

24/7 support

Get quick and easy access to Lenovo experts through a dedicated Customer Success Manager.

Predictable cost

Reduce upfront investment and align costs with changing business needs.

When looking to increase your IT infrastructure agility and avoid large CapEx outlays, consider Lenovo TruScale Hybrid Cloud for VMware for:

1

Fully managed solutions

So that you can focus on higher ROI initiatives instead of keeping your resources tied to managing the demands of the IT infrastructure.

2

Combined expertise

A solution co-engineered by Lenovo and VMware to help organizations of all sizes accelerate their cloud transformation.

3

Best of both worlds

The cloud experience with on-prem control, compliance, and security delivered through a flexible as-a-Service model.

Flexibility & scalability

Ability to scale out on-premises or public cloud, balancing the deployment mix.

Security

On-premise infrastructure, with existing firewalls and security controls.

Fully managed

End-to-end services including installation, deployment, configuration, and managed services.

Get ready to leverage the cloud and futureproof your business

Every company has its own distinct needs and IT challenges, but all of them have something in common – the need to rapidly adopt and deploy new technologies to enable their digital innovation journey. With solutions tailored to your unique challenges, Lenovo is the partner who can support you throughout your business' cloud transformation journey.
